

PA 1500 - Indication roller - Type INR

Area of application:

To start and stop the roller conveyor via the electrical control system. The indication is made with an inductive sensor that is affected when the roller is pressed down by the transport goods.

Technical data:

Available for roller length: 900 and 1100 mm.

Roller type: Ø50x1,5 mm.

Sensor: For inductive sensor type M18 (not included)

Return movement: With adjustable counterweight.

Other: Standard indicator roller does not fit in rotating, height-adjustable, tiltable roller conveyor and angular gear.
